APRIL 2005

NEW MODEL INFO- LANDINI REX & POWERFARM

Landini have the first major new release for 2005 with their all new Rex and Powerfarm series. The new Landini's offers a new 'Power shuttle' transmission which can be optioned up to 40 speed on certain models. The new series are available between 60 and 100 horsepower and are powered by a Perkins Euro2 Tear 2 direct injection engine. All this and a super-quiet cabin! They also offer the same high build quality that has seen Landini producing great tractors for the last 120 years. If you would like more information or an obligation free quote on one of these fantastic new units phone now!

WHAT'S HAPPENING IN SERVICE DEPARTMENT

Added support for our customers Agg-Tech Machinery has just invested in three new and updated workshop utilities to expand on our on-site service. The new vehicles are stocked with compressors, emergency parts and most of the necessary tools to perform all emergency on-site work that may be required. As per previously, the guys are available 24 hours per day, 7 days a week. Just ask for our emergency contact list.

Service is also able to work on almost any type of equipment that you may need repaired. We have the latest diagnostic equipment available and offer cost and time efficient repairs.

INTERNET SITE

We now have the Agg-Tech Machinery website available for your information. The site was launched just last week and includes information on the dealership, a copy of current and previous newsletters, and a full used machinery photo and pricing gallery! So jump on and have a look at www.aggtech.com.au

TECHNICAL TIPS

During the warmer months, make sure your tractors air-conditioning condenser and radiators are free of all obstructions like grass and insects. These can cause overheating and poor performance.

TECHNOLOGY UPDATE

Rynex Autosteer
As we all know technology is advancing every day and attempting to help make us more efficient. One of the latest advances in this area is 'Autosteer' which will minimise overlap when spraying or seeding your paddocks by ensuring you do not cover the same area more than once. Couple this with Rynex Autospray which ensures efficient use of all sprays and other materials and using this new technology could save you 'big bucks' by minimising waste. Both systems utilise GPS via satellite which is highly accurate. The system is actually designed in Australia. Phone today for a brochure.

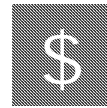

UPCOMING EVENTS

The 2005 Mildura Field Days
The 2005 Mildura field days are back this year and are on May 24th and 25th. Be assured that Agg-Tech Machinery will be well represented with all of the latest products on display and some great specials too!

Demo program
During the coming months we will be able to demonstrate some Fendt 930 tractors and Ezee-on seeders on site in a 'real life' situation which will allow you to see these great machines in action. If you are interested in having a demo, contact our sales team today and book a demo as these will be high demand once they start.
